

Adarsh Kumar

9506493685 | adarshrawat474@gmail.com | www.adarshcool.in

Full-stack developer & AI workflow engineer --- agentic AI systems and production web platforms.

EDUCATION

KIET GROUP OF INSTITUTIONS

BTECH INFORMATION TECHNOLOGY

June 2026 | Ghaziabad, UP

CITY MONTESSORI SCHOOL

ICSE

March 2022 | Lucknow, UP

UNDERGRADUATE

Data Structures & Algorithms

Database Management Systems

Operating Systems

Computer Networks

Software Engineering

Artificial Intelligence & ML

Information Security

(Information Technology)

SKILLS

AI & Automation: Agentic AI Workflows, Claude MCP, AWS Bedrock, LangGraph, Prompt Engineering, Cursor

Backend: Node.js, Express.js, Python, PostgreSQL, MongoDB, REST APIs, Microservices, JWT Auth

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Context API

DevOps & Cloud: AWS S3, AWS Bedrock, Netlify, Vercel, GitHub Actions, CI/CD, Docker (familiar)

Design: Figma, Product Design, Design Systems, Wireframing

CERTIFICATIONS

Machine Learning with Python

Python Essentials 1 & 2

Introduction to Cybersecurity

(Cisco Certified)

EXPERIENCE

BLU PARROT VENTURES | PRODUCT DESIGN LEAD & FULL STACK

DEVELOPER

September 2025 -- June 2026 | Gurugram, Haryana, India

- Led product design and full-stack development for an enterprise HCM platform (onboarding, QC, timesheets, leave workflows) on a microservices architecture with React, Node.js, Python, and PostgreSQL, deployed via Netlify CI/CD.
- Used AWS Bedrock for agentic workflow orchestration, automating multi-step approval and validation flows across the platform.
- Owned end-to-end UI/UX design systems for enterprise clients in Figma, and built supporting services in C# and .NET to integrate with existing enterprise systems.

TBI --- KIET | FRONTEND DEVELOPER & UI/UX DESIGNER

May 2024 -- February 2025 | Ghaziabad, UP

- Built responsive dashboards and workflow systems for startup management platforms using React.js and REST APIs; contributed to end-to-end product delivery across design, development, and deployment.

PROJECTS

NOURISH --- SWIGGY BUILDERS CLUB | FULL STACK DEVELOPER & AI ENGINEER

2026 -- Present | Remote

AI-powered Indian food calorie tracker accepted into the Swiggy Builders Club. Built a three-tier calorie engine (IFCT database lookup, fuzzy matching, Claude API fallback) integrating the Swiggy MCP API for real-time food data, IFCT nutritional data, and Claude-powered calorie intelligence — built with Next.js, Python, and PostgreSQL.

ENTERPRISE HCMS PLATFORM | FULL STACK DEVELOPER

Sep 2025 -- Jun 2026 | Gurugram

Technical deep-dive on the Blu Parrot HCM platform above: microservices architecture (React, Node.js, Python, PostgreSQL, REST APIs) with AWS Bedrock for agentic orchestration.

AI PROCUREMENT PLATFORM (BCG POC) | FULL STACK DEVELOPER & AI ENGINEER

2025 | Gurugram

AI-powered procurement platform with tender workflows, contract management, and Claude-powered agents for automated workflow validation, spend analytics, and enterprise automation across distributed services.

DUBAI ENTERPRISE POCS ↗ | FULL STACK DEVELOPER

2025 | Remote

Built CRM and enterprise workflow POCs for DP World, Dubai Chambers, and Rashid Bin Ali Library using React, Node.js, REST APIs, and Vercel CI/CD. **Selected top 3 of ~1800 submissions.**

INFERRED THEOREM --- FINANCIAL REPORTING ↗ | AI WORKFLOW DEVELOPER

2025 | Remote

Automated financial reporting system using Python, AWS Bedrock (agentic orchestration), LangGraph multi-agent pipelines, Claude MCP data extraction, and PostgreSQL — generating live institutional-grade monthly fund reports.
